Turning On the Projector

Tap the power button on the touchscreen to turn the projectors on and lower the projector screens.

If you only want to use a single projector, select either the left or right projector buttons to only power the room with a single projector. Otherwise, to use both projectors, select *Both*.

Source Selection

Audio Controls

Source Selection:

Press a button to display the selected source on the projector. These buttons will also display additional controls for the document camera, blue ray player, and TV Tuner.

Room Control:

Press the UP and DOWN arrow buttons to move the projector screen up and down and the mute button to hide the image being displayed by the projector without turning it off.
Audio Controls:

Press the UP and DOWN arrow buttons to control the source audio volume, and the mute button to mute all audio from the selected source.

Turning Off the Projector

Tap the *System Off* button to simultaneously raise the projector screen and power down the projector(s).
